

Activity-3

Student Outreach Programme in view of World Food Day

12.10.2023

Brief Report:

The departments of Botany and Economics jointly organized an outreach program at Government Girls High School, Nandikotkur, on October 12, 2023, on the occasion of World Food Day, which is to be celebrated on October 16, 2023. Dr. T Shali Saheb, Lecturer in Botany, and Smt. E Lakshmi Devi, Lecturer in Economics, along with our college students, visited Government Girls High School. The students from our college explained the theme of World Food Day: "Water is life, water is Food. Leave no one behind." They emphasized the critical role of water in sustaining life on Earth and its foundational importance for our food supply. The theme also seeks to raise global awareness about the challenges posed by rapid population growth, economic development, urbanization, and climate change, which threaten water availability.

They further educated the school children about the purpose of World Food Day, which is celebrated annually to promote awareness of hunger and action for the future of food, people, and the planet
