

ACTIVITY-1

National Energy Conservation Day Activity-1

Pasting of Stickers on 05.12.2024

Brief Report: The Department of Physics regularly observes National Energy Conservation Day by organizing a series of initiatives to raise awareness among staff and the general public. For 2024, the first activity undertaken is the pasting of stickers by spreading the message "Save Electricity-Save Energy."

Objectives:

Pasting stickers to save energy in colleges, especially in observance of **Energy Conservation Day**, serves several important purposes:

- Stickers are strategically placed in high-visibility areas to remind everyone about the importance of conserving energy.
- Encourages students and staff to adopt simple energy-saving practices like switching off lights, fans, and computers when not in use.
- Creates a culture of responsibility and mindfulness toward energy usage.
- Demonstrates how small individual actions collectively lead to significant positive outcomes
- Highlights the institution's dedication to energy conservation and sets an example for others to follow.

Releasing of stickers by Principal ,Physics Staff &students

In Skill HUB

In Physics Lab

In Library

In Staff Room

In Botany Lab

In JKC Lab

Outcome: participating in such initiatives, students not only contribute to energy conservation but also develop habits and awareness that extend beyond the college, positively influencing society.
