

ACTIVITY-2

Physics Lab Cleaning on 4.12.2024

Physics Laboratory cleaning was taken up on 4.12 .2024.

The **objectives are:**

1. Encourage students to understand and practice sustainable environmental practices, highlighting the importance of maintaining a clean and eco-friendly workspace.
2. Ensure a safer and more hygienic working environment by reducing hazards caused by clutter, spills, and waste materials.
3. Develop teamwork and collaboration as students work together to achieve a shared goal of cleanliness and sustainability.
4. Educate students on reducing resource wastage, including water, electricity, and laboratory materials, contributing to environmental conservation.
5. : Ensure adherence to institutional and environmental regulations for proper waste management and disposal in laboratories.

Outcome:

- 1.A clean and organized lab enhances productivity, reduces accidents, and fosters a positive work environment.
- 2.Proper disposal and recycling of materials minimize waste accumulation and environmental impact.

3. Students learn the practical aspects of waste segregation, recycling, and energy-efficient practices.

4. Cleaner labs reduce exposure to harmful substances, promoting better health for students and staff.

5. The initiative can instill a long-term habit of maintaining clean and green practices in personal and professional life.
